13. SUMMARY EVALUATION OF SIGNIFICANCE	IMPACT <sup>□</sup>				Can Impact Be Mitigated <sup>□</sup>	Comment Index
	Unknown <sup>□</sup>	None	Minor <sup>□</sup>	Potentially Significant		
Will the proposed action, considered as a whole:						
a. Have impacts that are individually limited, but cumulatively considerable? (A project or program may result in impacts on two or more separate resources which create a significant effect when considered together or in total.)		X				
b. Involve potential risks or adverse effects which are uncertain but extremely hazardous if they were to occur?		X				
c. Potentially conflict with the substantive requirements of any local, state, or federal law, regulation, standard or formal plan?		X				
d. Establish a precedent or likelihood that future actions with significant environmental impacts will be proposed?		X				
e. Generate substantial debate or controversy about the nature of the impacts that would be created?		X				
f. ♦ For P-R/D-J, is the project expected to have organized opposition or generate substantial public controversy? (Also see 13e)		X				
g. ♦ ♦ For P-R/D-J, list any federal or state permits required.		X				

Narrative Description and Evaluation of the Cumulative and Secondary Effects on Land Resources (Attach additional pages of narrative if needed):

Include a narrative explanation under Part III describing the scope and level of impact. If the impact is unknown, explain why the unknown impact has not or can not be evaluated.

Include a narrative description addressing the items identified in 12.8.604-1a (ARM)

Determine whether the described impact may result and respond on the checklist. Describe any minor or potentially significant impacts.

Include a discussion about the issue in the EA narrative and include documentation if it will be useful.

2. Description and analysis of reasonable alternatives (including the no action alternative) to the proposed action whenever alternatives are reasonably available and prudent to consider and a discussion of how the alternatives would be implemented:

- a) A no action alternative would result in decreased sheltered recreational opportunities for special events and groups wishing to use the park.
- b) An alternative is to rent or lease tent like structure for special events that would/could require overhead protection from the elements. This method would be costly over the years and allow for some degradation of the site with impact of setting up and taking structure down. In high winds it also allows for increased liability due to higher risk of accidents with high winds, tripping over tent poles, lines, etc. It would also detract from the aesthetic nature of the site.
- c) An alternative is to have groups go to neighboring sites, other Parks. This would detract from the total group use concept of the Park.

3. Evaluation and listing of mitigation, stipulation, or other control measures enforceable by the agency or another government agency:

N/A

4. Based on the significance criteria evaluated in this EA, is an EIS required? YES / NO If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:

NO - Scope of project is very limited. construction will take place in an area of the park that already has sustained substantial development. No additional environmental review is required.

5. Describe the level of public involvement for this project if any and, given the complexity and the seriousness of the environmental issues associated with the proposed action, is the level of public involvement appropriate under the circumstances?

There will be a 30 day period for public review, advertised in the Helena Independent Record Newspaper.

6. Duration of comment period if any:

January 1, 1995 to February 1, 1995.

7. Name, title, address and phone number of the Person(s) Responsible for Preparing the EA:

Dear Marcella:

The Department of Fish, Wildlife and Parks is proposing to construct a shelter at Spring Meadow Lake State Park (see attached map). Based on this site's past use as a gravel pit and past development, we believe it is unlikely this project will impact cultural resources.

Please provide us with your comments regarding this proposed project.
